

UV-5A Valve Training Simulator

Cuts Training Time and Costs By Providing “Hands On” Training with an actual UV-5A Valve

Ideal for training construction, repair and service personnel. Completely portable, rolls on casters and fits through standard doors. Reacts the same as a normal elevator to provide hands-on training for valve adjustments, repairs or replacement. The UV-5A valve can be completely disassembled without removing it from the simulator.

Simulator Features

- Includes pump, motor, jack assembly and valve
- Adjustable slow down and stop switches
- Portable constant pressure push button control
- Plugs into any 110VAC, 10 AMP wall socket
- L. E. D. lights indicate energized/de-energized coil condition
- Casters for ease of movement (two swivel)
- Total weight - 600 lbs. (approximately)
- Total height - 55 inches
- Ram and pump pressure gages
- Adjustments include:

Up acceleration
Up full speed
Up slow down
Up leveling
Up stop

Down acceleration
Down full speed
Down slow down
Down leveling
Down stop
